

Part 2. Religious usage man-made. There have always been Sages. Final truth only transmittable to a receptive mind. Absolute truth? Origins of religion in remote beginning of our race. Early third Race felt itself one with the unknown and invisible ALL. Middle third Race either became "Sons of Darkness" or "Sons of Light". They had their bright Gods around, even within themselves. The bright Spirits animated the man of clay. The "Golden Age". Atlanteans, first "Sacrificers" to the god of matter. Symbol of Cain. The Spirits of the Earth; dark, cosmic, anthropomorphic Powers. Hebrews' tribal god. Descent of Spirit into Matter. Divine Man evolves through the Races of mankind. "Fallen Angels". Idea of God as Creator and Governor. Divisive effects of religious beliefs. Masters KNOW their teaching is truth. No God, as normally thought of. Unanswerable arguments against conventional concepts. Evil, no existence, per se. Diseases are hereditary. "The Truth shall make you free". Courage needed. Genuine mystical experience. The religious urge. Working harmoniously with Nature, as co-workers. The silent and sanctified solitude of our Souls.
